This next section deals with screening information. We have advanced screening and diagnostic equipment for both **Obstructive Sleep Apnea (OSA)** and **Temporomandibular Disorder (TMD)**. As usual, I am making sure our patients have access to what most other dental patients in WNY do not have! Conditions such as **OSA can be life threatening**. We have letters of recommendation from this area's top Sleep Specialists and the associated Sleep Labs because of our dedication and knowledge in this area. OSA affects about 25% of the population. Therefore everyone does not need to be treated. Since this is a medical condition, we can bill your Medical Insurance and NOT take away anything from your current dental benefits. We have already signed up with MANY Medical Insurance companies, including Medicare! Below are basic screening questions that can guide us more to the people who are at risk. Screening forms are NOT perfect! If you think there may be a problem then it is VERY important to mention this to your MD and us!! **TMD** related issues affect many patients by way of jaw pain and discomfort, headaches, premature breaking and wearing of teeth, restorations breaking down much earlier than normal, etc. As you can see, we are taking a whole body approach to your treatment. Please follow the directions on the following page. You are almost done!!!
